The **HFSD50** Huxford Freezer is a countertop, upright, top mounted, single door, small, commercial display freezer, with a video display including speaker. The internal operating temperature is between -14°C to -18°C so it will store and display ice cream, ice and any other foods or drinks that are able to be frozen safely. Even though this unit has a heated door and video display, it is quite low in energy consumption (R290 a natural and environmentally friendly refrigerant version coming soon!). Featuring an eye catching, "HD" high-definition video display on top which plays media directly from an SD Card, USB or HDMI cable, complete with sound. Designed with compact components for maximum storage capacity and visibility through the front glass door. The front top mounted bright internal LED lights illuminate the entire freezer contents. With the video display this unit is ideal for attracting customer attention to product (complete with wireless directional remote control, must be aimed at rear). Fitted with a rear digital controller that also controls the internal light and digitally displays the temperature. Designed for everyday use and perfect for summer sales of ice-creams and other frozen goods. Suitable for up to 30°C ambient temperature.

HFSD50 Advantages

Warranty

- 1 Year Standard Warranty (Parts & Labour)

Lockable Door

- Lockable door with 2 keys standard

Video Display

- Play HD media from an SD Card, USB or HDMI input, includes speaker.
